

# Pol Maresch Marxuach

C++/C# Unity Game Developer

## Profile

Passionate game developer focused on programming, with experience in Unity and languages such as C# and C++.

I stand out for my communication skills, consistency, and problem-solving abilities, as well as being adaptable and well-organized.

I am eager to continue learning and improving my skills in game development.

## Skills

- **Libraries:**
  - SDL, OpenGL, SDL2, ImGui, PhysFS, Box2D
- **Softwares:**
  - Unity, Godot, Visual Studio, Agile, GitHub, Excel y Adobe Photoshop.
- **Programming languages:**
  - C, C#, C++, Flutter (Dart), GDScript, Lua.

## Languages

- Catalan: Native
- Spanish: Native
- English: Intermediate B1

## Hobbies

Padel - Reading - Chess

## WORK EXPERIENCE

### ISALUD.COM (2025 - Present)

- Development of a **gamified insurance game** for **ISALUD.COM** using **Unity** and **C#**.
- Responsible for implementing programming logic and interactive elements.

### CUPRA - "CUPRA GAMIFIED CAR" (2023 - 2024)

- Design and development of an interactive user interface for **CUPRA** using **Unity** and **C#**.
- Responsible for programming logic and interactive elements focused on the UI.

### CODELEARN - Programming Professor (2023/2024)

- **Programming instructor** at a summer camp.
- In charge of teaching computational **logic and programming fundamentals** to young students, using didactic methodologies adapted to different levels of knowledge.

## EDUCATION

### BARCELONATECH - UPC TERRASSA

VIDEO GAME DESIGN AND DEVELOPMENT DEGREE  
CITM - Image and Multimedia Technology Center  
2020 - 2024

## FEATURED PROJECTS

### THESIS: High Dimensions (3D to 2D) in the Video Game World

- Game developed in **Unity** featuring an innovative mechanic that combines the **player's 2D perspective** with interaction in a **3D environment**.

### Salt-Peter and the Philosopher's Stone

- **Turn-based puzzle game** developed in **Unity**
- Responsible for the logic of **enemies, items, and map elements**
- Created by a team of 5 people in 2 weeks for the **15th Pirate Software Game Jam**.

### Guardians of the galaxy: The bet

- **Top-down action shooter** set in the Marvel universe, developed in **C++** using a custom game engine.
- Team project with 29 students at CITM, where I was in charge of the **UI logic**.

### Alporo Engine

- **3D Game Engine** developed by two students
- Created using **C++** and **OpenGL**.
